

Bella's Introduction

I am taking this class mostly because it's a requirement for my Digital Media major. I also want to learn more about web development and possibly pursue a future career in it.

Bella's Hobbies

Video Games

My favorite hobby of mine would be playing video games. I tend to enjoy multiplayer games more than single player, although I do enjoy some single player games. Most of the fun of gaming for me is playing with friends and messing around. Some of my favorite games at the moment are:

- Genshin Impact
- Resident Evil
- Lethal Company

Baking

I enjoy baking and cooking, but I mostly bake. I used to bake all the time with my step mother, we still bake things together occasionally when we have the time. A couple of the treats I've baked are:

- Creme Brulee
- Kolaczki cookies
- Banana Bread

Going out

I enjoy going out with friends and family. Whether it's grabbing something to eat, or simply finding a parking spot and just sitting in the car and talking. I just enjoy being out of the house sometimes and spending time with the people closest to me.
